

The Industry's Premium Matte/Gloss Heat Transfer

Ultima™ Split Finish is a multi-purpose, stretchable screen printed heat transfer offering the ability to do matte and gloss finishes within the same graphic. With Ultima™ Split-Finish, the designer chooses which parts of the final graphic will have a gloss finish and which parts will have a matte finish. This opens up a world of possibilities for hidden designs within your artwork or for calling attention to specific portions of a graphic. In a nutshell, Ultima™ Split Finish allows you to incorporate depth and texture by using both sides of the finish spectrum simultaneously.

For Various Industries & Uses

Ultima™ Split Finish is designed for both synthetic and organic fabrics and has been formulated to be used for many different markets. It is a perfect fit for team sports, performance wear, casual wear, street wear, and many other market segments.

Product Features:

- Superior stretch capability
- Durable wash resistance
- Holds great detail
- Pantone® color driven
- Phthalate compliant
- Metallic & shimmer inks available
- Available with blocker for dye migration
- Semi transparent carrier film

For Use On:

Apparel:

- Polyester & Polyester Blends
- Polyester-Spandex Blends
- Dri-Fit & Moisture Wicking Fabrics
- Bamboo & Hemp
- Neoprene

Application Instructions:

- Time: 8 – 10 seconds
- Temperature: 320°F / 160°C
- Pressure: 40 lbs.
- Peel: Cold
- Pre-heat materials

Minimum Line Weights:

Minimum Line Weight For Matte Finish:

- Positive line weight: 1 pt.
- Negative line weight: 1 pt.

Minimum Line Weight For Gloss Finish:

- Positive line weight: 2 pts.
- Negative line weight: 2 pts.

Heat Transfer Storage:

- Heat transfers should be stored in original packaging until ready for use.
- Store away from direct heat, sunlight and high humidity.
- Shelf life: one year from date of shipment.

Heat Transfer Limited Warranty

8.2021

All statements, technical information and recommendations concerning products or samples provided by Insta are based upon tests believed to be reliable but do not constitute a guarantee or warranty.

Since the conditions under which Insta's heat transfer products may be applied to garments and other products are beyond its control Insta assumes no liability for the results obtained during and from transfer application process to the garment fabric or otherwise. It is the customers responsibility to independently determine, prior to use, the suitability, finish and wash of these products for their specific applications and that the end product laundered with soaps containing bleach, or harsh detergents with bleach or bleach particles. No warranty, expressed or implied is given. Insta's liability is limited only to the purchase price of the heat transfers.

The limited warranty is further subject to the condition that the Customer notifies Insta of any defect in material or workmanship within thirty (30) days of the date of delivery. Shelf Life of transfers is one year from date of shipment, unless otherwise specified in writing. Transfers should be stored in the original packaging and in a cool, dry area away from direct sunlight at a temperature no higher than 75F (24C). The customer is financially responsible for third party testing performed by an independent lab.
